ABSTRACT

Teaching Planning System for Primary School is an online system for preparing a teaching planning. This system is purposely for teachers in primary school especially for Sekolah Kebangsaan Kangkar Pulai as a case study. The main reason of this system is to prepare and help teachers in managing their teaching planning before they start the classes. Beside that, this system also help the head master to give his comment to their teachers easily. During developing this system, the prototype methodology and UML method had been used. This system is also developed using PHP technology and MySQL as it's database. With this system, all teachers can prepare their teaching planning quickly and easily.
